

# V3ORIGINAL™

## V3 ORIGINAL™ AT A GLANCE:

V3 Original is an effective tool in your arsenal to help you achieve a healthy, vigorous lifestyle bursting with infinite possibilities.

### V3 ORIGINAL: ORIGINAL PERFORMANCE FORMULA

\*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

## SUGGESTED USE FOR MAXIMUM EFFECTIVENESS:

For best results, take two (2) capsules daily with 8 ounces of water in the morning or early afternoon on an empty stomach or two hours after a meal. For additional energy, an additional two (2) capsules may be taken. DO NOT exceed four (4) capsules per day. Avoid taking after 4 p.m. to ensure proper sleep.

Combine the appetite crushing, mood boosting, and energy elevating power of V3ORIGINAL with proper nutrition and exercise for optimal results. It's a simple, effective solution that puts you back in charge of your health and wellness.\*

<b>Supplement Facts</b>		
30 servings per container		
Serving size 2 capsules		
	Amount Per Serving	% Daily Value <sup>^</sup>
Thiamine (vitamin B1)	2 mg	167%
Riboflavin (vitamin B2)	3 mg	231%
Niacin (as niacin & niacinamide)	22 mg	138%
Vitamin B6 (as pyridoxine)	5 mg	385%
Vitamin B12 (as methylcobalamin)	30 mcg	1250%
Pantothenic acid	10 mg	200%
Chromium (Polynicotinate)	600 mcg	1714%
<b>Proprietary Blend</b>	813 mg	†
B-Phenylethylamine (PEA), Citrus Aurantium Fruit Extract, Infinergy™ (Dicafeine Malate), L-Theanine, Caffeine Anhydrous, Cocoabuterol™ (Theobroma Cacao Extract), Dynamine™ (Methyllicberine), Bioperine™ (Black Pepper Extract)		
<sup>^</sup> The % Daily Value tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.		
<sup>†</sup> Daily Value not established.		

**Other ingredients:** Vegetable Capsule, Microcrystalline Cellulose, Silicon Dioxide, Magnesium Stearate.

**Caffeine Content:** 180mg/serving

## FREQUENTLY ASKED QUESTIONS:

### What is V3 Original?

V3 Original™ is a premium weight management formula designed to enhance performance, increase metabolism, and suppress appetite with its powerhouse blend of vitamins and unique ingredients to initiate total weight management support. It's a simple, effective solution that puts you back in charge of your health and wellness.\*

### What are the benefits of using V3 Original?

V3 Original helps to increase energy, stimulate fat loss, suppress appetite, and improve your overall mood. By stimulating thermogenesis in the body, V3 Original works naturally with your body to help boost metabolism while suppressing appetite and hunger for total weight management support.\*

### How do I take my V3 Original?

For best results, take two (2) capsules daily on an empty stomach with 8 ounces of water in the morning or early afternoon, or two hours after a meal. For extra energy, an additional two (2) capsules may be taken. DO NOT exceed four (4) capsules per day. Avoid taking after 4 p.m. to ensure proper sleep.

### Does V3 Original contain nootropic nutrients and what do they do?

Yes! The nootropic nutrients in V3 Original help enhance cognitive function and improve overall mood!\*

### Can I take other Vfinity products while using V3 Original?

All Vfinity products fully support your body as part of a healthy weight management program. Each works synergistically together and promotes a healthy balance for a total lifestyle transformation system. Along with proper nutrition and exercise, Vfinity's product system is designed to put you back in charge of your health and wellness.

VFINITY®

## INGREDIENT BENEFITS:

### B VITAMIN COMPLEX

B vitamins turn carbohydrates into glucose, which is the fuel that produces energy. According to the University of Maryland Medical Center, B vitamins also help the body use fat and protein and are also important for maintaining a healthy nervous system, eyes, skin, hair and liver.

#### THIAMINE (Vitamin B1)

- Thiamine is involved in many body functions including the nervous system, heart and muscles.
- Helps the flow of electrolytes in and out of nerve and muscle cells, enzymatic processes and carbohydrate metabolism
- Research from the University of Maryland Medical Center has found that B1 may strengthen the immune system and improve the body's ability to control mood and physiological impairments due to stress.
- Helps increase energy, promotes a positive mood, prevents memory loss, and enhances learning abilities

#### RIBOFLAVIN (Vitamin B2)

- Helps the body break down carbohydrates, proteins and fats to produce energy, and allows oxygen to be used by the body
- A study by the department of neurology of Humboldt University of Berlin found that those taking high doses of riboflavin had significantly fewer migraines
- Helps protect glutathione, which is an important antioxidant in the eye. The U.S. National Library of Medicine (NLM) reports that eating a diet rich in riboflavin can lower the risk of developing cataracts. Taking supplements containing riboflavin and niacin may also be helpful in preventing cataracts.

#### NIACIN (as Niacin & Niacinamide)

- Helps the body break down carbohydrates, fats and proteins into energy, according to the University of Maryland Medical Center
- Has a role in producing certain hormones in the adrenal glands and helps remove harmful chemicals from the liver
- According to the National Institutes of Health, niacin is also used for treating migraine headaches, circulation problems and dizziness
- Known for lowering LDL (bad) cholesterol and triglycerides in the blood
- Can cause mild flushing in a small percentage of users that produces feels of warmth, itching, redness or a tingly feeling under the skin. The flushing is harmless and usually subsides within one or two hours

### VITAMIN B6 (Pyridoxine)

- Used to make several neurotransmitters in the brain responsible for telling the body to make hormones that influence mood and the body's sleep cycles, according to the University of Maryland Medical Center.
- According to the Harvard School of Public Health, B6 controls levels of the amino acid homocysteine in the blood, which may be key to lowering susceptibility to heart disease and stroke
- Without B6, the body wouldn't be able to absorb vitamin B12
- Known to synergize with the entire vitamin B-complex to metabolize proteins, fats, and carbohydrates and promotes healthy cardiovascular, nervous, and immune systems.

### VITAMIN B12 (Methylcobalamin)

- Crucial to the human body, which needs it to produce new DNA, red blood cells, proteins, hormones and lipids (fats). Vitamin B12 is also key to the health of nerves.
- Helps improve mood and concentration as well as the immune system

## THERMOGENIC & FAT BURNING COMPLEX

### CHROMIUM POLYNICOTINATE

- Considered an essential trace element, this metal contributes to weight loss by increasing muscle and decreasing body fat.
- Chromium augments the signaling of insulin receptors by its effect on the protein chromodulin, which is necessary for the proper functioning of insulin

### INFENERGY™ (Dicafeine Malate)

- A form of time release caffeine that naturally boosts energy and stimulates the nervous system.
- Combines the well-established properties of caffeine and malic acid, Infinergy™ offers a multi-dimensional ingredient that not only optimizes energy levels, but also stimulates thermogenesis while promoting mental focus

### CAFFEINE ANHYDROUS

- Used to improve physical strength and endurance as well as provide mental stimulation and increase fatty acid oxidation.

### B-PHENYLETHYLAMINE (PEA)

- This naturally-occurring chemical found in the body and extracted from dark chocolate, improves your sense of well-being, pleasure, and happiness
- Activates the TAAR-1 receptor in the brain and increases the release of serotonin, epinephrine (adrenaline), dopamine, and norepinephrine (noradrenaline) from neurons. These neurotransmitters affect mood, cognitive function, and mental well-being

**INGREDIENT BENEFITS:** (continued)**THERMOGENIC & FAT BURNING COMPLEX**  
(continued)**CITRUS AURANTIUM FRUIT EXTRACT**

- Increases metabolic rate and fat-burning and shows synergism with caffeine.
- Has been clinically shown to increase caloric expenditure by 65kcal with no significant influence on blood pressure or heart rate.
- Increases glucose uptake by muscles and prevents conversion of sugars into fats
- Helps increase energy levels and provides superior appetite control

**COCOABUTEROL™ (Theobroma Cacao Extract)**

- Cocoabuterol® natural cocoa (Theobroma cacao L.) extract concentrates the most bioactive compounds, supplying N-Coumaroyldopamine, N-Caffeoyldopamine, EGCG and Theobromine
- Promotes fat burning, increases blood flow, enhances mood and has antioxidant effects, supports physiological pathways which improve insulin sensitivity, supports muscle protein synthesis, decreases skeletal muscle atrophy.
- Significantly increase cAMP via beta-adrenoceptor, which can exert attractive fat burning and muscle building functions

**L-THEANINE**

- Theanine promotes relaxation without sedation and helps you stay calm without making you tired or drowsy.
- Reduces stress and improves attention.
- Theanine helps take off the 'edge' of caffeine, and a synergistic effect is seen when coupled with caffeine in promoting focus and attention.
- Promotes reduction of inflammation in the small intestine and improves the body's immune system function
- Clinically proven to reduce blood pressure caused by mental and physical stress

**DYNAMINE™ (Methyllicberine)**

- Boosts mental and physical energy without jitters or irritability.
- Supports a positive mood, increases motivation to exercise, and improves perceived focus and concentration. Does not lead to rapid tolerance or habituation.

**BIOPERINE™ (Black Pepper Extract)**

- Bioperine™ is the trademarked version of piperine, a black pepper extract that increases the absorption of various nutrients and inhibits the breakdown of fat-burning compounds such as caffeine and the catecholamines, prolonging the effects of stimulants and increasing their bioavailability.
- Piperine also reduces LDL cholesterol and plasma lipids while elevating HDL cholesterol and the thyroid hormones.
